

Shrihariprasath Basuvaiyan

Software Technical Lead

Pro-active and highly motivated Embedded Software Engineer with 13 years of experience in all aspects of the software development life cycle.

Around 7+ years of experience in Automotive ECU software development for Active system (Electric power steering, Electric power brake, Vehicle motion control) and AUTOSAR Architectures.

Educational Qualification

PG Diploma in Electric Vehicle technology
Centre for Automotive Research and Tribology,
IIT Delhi | OCT 2025 – OCT 2026
M.S (By Research) - Information and communication Engineering
Centre for Research, Anna University, Chennai |
JAN 2016– MAR 2021
B.E (Electronics and Communication Engineering)
KPR Institute of Engineering & Technology,
Coimbatore | JUN 2010 – APR 2013

TECHNICAL SKILLS

Programming Languages - C, C++, Embedded C, Python
Microcontroller – 8/16/32 bit (PIC30F, PIC18F, PIC16F, STM32F, Renesas- RH850, and Infineon-A1G(TC23X/27X), A2G(TC33x/TC36X/TC37X)
Serial Communication protocols - CAN, CAN FD, Flexray, I2C, SPI, UART
Vector tools- CANalyzer, CANape, CANoe
AUTOSAR configurators- Vector Davinci Configurator and DSPACE System desk
Architecture Tools- IBM Rhapsody, Enterprise Architecture
SDLC Models- V Model, Agile Model (SAFe)
Compiler and Debugger- GHS and Tasking, UDE Debugger, Trace 32
Other tools- Jira T&R, Bit-bucket, Git, Integrity PTC, IBM Rational Clear Case, Clear quest, IBM Doors, Jenkins, Azure Dev OPs.

ACHIEVEMENTS

Star Award of Q3 2023 and Q4 2024- From ZF acknowledging the contribution towards the organization.
Excellence awards of Q4 2022, Q1 2023, and Q3 2024- From ZF for Outstanding performance.
Star Award of 2021- From UST global for outstanding performance during pandemic situation.

INTERESTS

- Adaptive AUTOSAR
- ADAS
- Artificial intelligence
- Internet of Things
- Cybersecurity systems

PROFESSIONAL EXPERIENCE

SW Technical Lead

ZF Overseas Inc, Seoul, South Korea | SEP 2025- Till Date
Clients : HKMC Namyang R&D, South Korea.

Responsibilities:

- Lead end-to-end application software development and technical delivery for Steering ECU programs within the Chassis 2.0 platform using AUTOSAR architecture.
- Drive software architecture, feature integration, and reusable application design across steering product variants while ensuring scalability and performance.
- Coordinate with cross-functional teams including BSW, Integration, System, Validation, Functional Safety, and Cybersecurity teams for successful ECU development.
- Ensure compliance with Automotive SPICE, ISO 26262 Functional Safety, and ISO 21434 Cybersecurity standards throughout the software development lifecycle.
- Support software integration, debugging, root cause analysis, and customer issue resolution using tools such as Vector DaVinci, CANoe, CANalyzer, Lauterbach, and UDE.
- Act as the Global SW interface for customer discussions, design reviews, technical mentoring, release planning, and delivery execution for global steering product team across the world for HKMC OEM.

Technical Lead

ZF Technology Centre India, Hyderabad | JAN 2022 – SEP 2025

Clients : APAC OEMS- HKMC, GEELY, BYD, Changan, GWM, GAC, JAC, SAIC.

Responsibilities:

- Integration of application software components, BSW Modules and Low-level Drivers of Electric Power Steering (EPS) with Different kinds of architectures & product types as Column Drive, Belt Drive, Dual pinion & Steer by Wire (SBW).
- AUTOSAR ECU model configuration, NVM, OS and RTE Code generation.
- Build Configuration update and Linker Script adaptation.
- Responsible for integration of secure bootloader and cyber security features.
- Debugging & Resolving issues raised by OEMs.
- Team handling with their project's activities & Technical support for debugging to resolve the issues raised by OEMs.

Embedded SW Lead

UST Global Technologies, Coimbatore | MAR 2019 – JAN 2022

Client : Robert Bosch Engineering and Business Solutions.

Responsibilities:

- Develop software components & responsible for Unit level Implementation and Integration.
- Responsible for release and baseline of the application component for platform foundation software delivery.
- Working as part of DevOps, which involves in development of reliable software and tools environment for CI/CD.
- Planning and coordination with software project manager about software integration and testing.

Senior Engineer-R&D

SS Systems, Coimbatore | JUN 2013 – MAR 2019

Responsibilities:

- Designing, programming, testing and debugging system software required for the product development in the domain of Industrial Power Electronics and Internet of Things.
- Responsibilities include analysis of the customer requirement, design of hardware and software architecture, integration of sub modules and delivering defect free product.
- Implement software functions and perform bench tests and unit tests to verify them.
- Developing test setup/jigs required for the developed products & preparing test report of the same.
